PROFILE

Full Stack Developer with 3+ years delivering production-grade Laravel & Vue.js applications for real estate, eCommerce, and enterprise clients across 3 companies. Skilled in RESTful API development, Stripe & PayPal integrations, OTP authentication, and scalable backend architecture using Repository Pattern and MVC principles.

PROFESSIONAL EXPERIENCE

Laravel and Vue.js

Webpenter IncMay 2025- Present

- Developed and maintained full-stack web applications using Laravel and Vue.js
- Built dynamic modules including Stripe integration, OTP-based authentication, and user dashboards
- Applied best practices like Repository Pattern, API Resource responses, and form request validation
- Collaborated on real client projects including property listings, real estate, eCommerce, and others.

Custom Software Developer

Deixtra Pvt Limited (Remote)June 2025 - Sep 2025

- Developed custom business software using Laravel and Blade for enterprise clients.
- Built scalable admin dashboards, reporting modules, and optimized database schemas.
- Delivered performance-critical web applications tailored to specific client requirements

API Developer

Webpenter IncAug 2024 - April 2025

- Developed secure and scalable RESTful APIs using Laravel, following best practices and clean architecture
- Implemented authentication systems using Laravel Sanctum and custom OTP verification for user access control
- Integrated third-party services like Stripe (payment processing) and Gmail SMTP for real-time API-based features

PHP Developer

Webpenter IncFeb 2024 - Aug 2024

- Built and maintained backend functionality using core PHP, focusing on logic, form handling, and dynamic data rendering
- Gained experience in writing clean, reusable PHP code and integrating with MySQL for data storage and retrieval

Frontend Developer

Devicon Software HouseDec 2022 - Nov 2023

- Developed full-stack web applications covering both frontend and backend layers.
- Built dynamic modules using Laravel, Blade templating, and MySQL database.
- Collaborated using Git-based workflows on multiple concurrent client projects.
